

# Drivetrain

Drivetrain lets you check on and manage your Transmission BitTorrent downloads. It provides all the details of the web interface in a native iPhone app that's easy to use.

# Torrent Info

Pause the Torrent

Resume Downloading

Delete Torrent

# Torrent Browser

After selecting, click on a link to upload to transmission

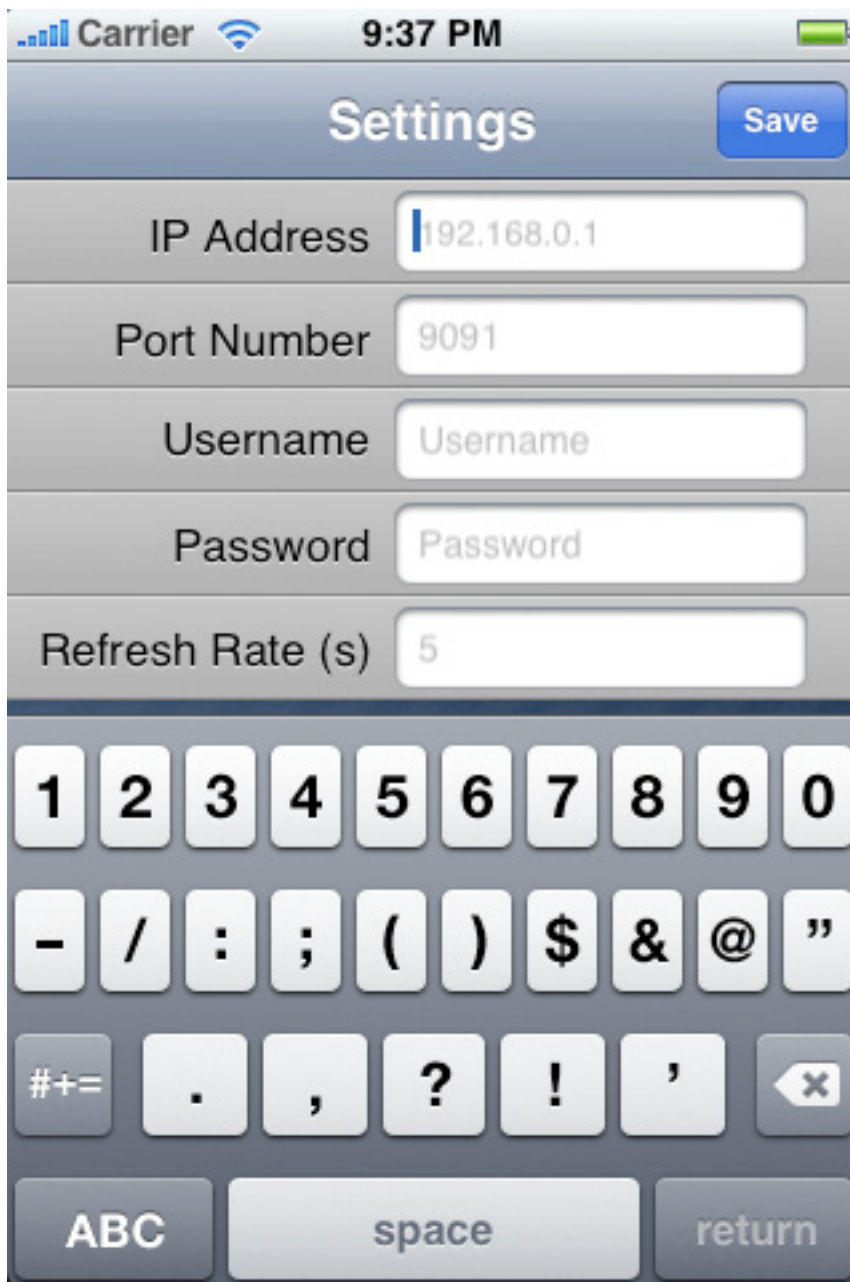

Go To Homepage

Standard Web Controls

## To Upload a torrent:

1. Navigate to the desired webpage.
2. Click on the upload cog
3. Click on the link to the torrent download
4. Drivetrain uploads the torrent to Transmission for download.

# Settings

The screenshot shows the Settings app interface on an iPhone. At the top, the status bar displays 'Carrier', signal strength, Wi-Fi, the time '9:37 PM', and battery level. The main title 'Settings' is centered, with a blue 'Save' button on the right. Below the title are five input fields: 'IP Address' (192.168.0.1), 'Port Number' (9091), 'Username' (Username), 'Password' (Password), and 'Refresh Rate (s)' (5). A numeric keypad is visible at the bottom, with keys for digits 0-9, symbols like hyphen/slash, colon/semicolon, parentheses, dollar/ampersand, at-sign, and quote, as well as a backspace key and an 'x' key.

After entering the Settings, further changes can be made in the Settings app.
